Lorne Proudfoot Choice of Convention

N. D. Stewart, Coltholme, Elected President of U.F.A. Political Assn.
R. Shaw, Oyen, Vice-Pres.

Lorne Proudfoot, M.L.A., was the unanimous choice of the Acadia Provincial Riding at the U.F.A. convention which was held in the Community Hall, Cereal, on Wednesday, May 21. The convention was well attended. Routine business was first disposed of, Mr. Shaw being chosen as chairman. Credential, business and resolutions committees were appointed. The minutes of last annual meeting were read and election of officers took place. N. D. Stewart, Coltholme, was elected president of the U.F.A. Political Association and Mr. R. Shaw, of Oyen district, vice president.

Two locals handed in nominations for Mr. Proudfoot, and several delegates from different locals made enquiries as to whether Mr. Proudfoot had been nominated.

Mr. Proudfoot, who took the floor to speak after the nomination, was given an enthusiastic reception. He thanked his constituents for this renewed proof of their confidence, and said that if elected he would not discriminate and would do his utmost, as he had done in the past nine years, in the best interests of his constituency and of the province as a whole.

Strong feeling against the discrimination of the Farm Loans Board was manifested in the various resolutions presented to the convention, and much discussion took place, Mr. Proudfoot tactfully taking the floor several times.

Exception to the method adopted by the Provincial government in administering gasoline tax legislation was also forcibly expressed and many good speakers took the floor. Amongst the speakers known locally were Clark Fraser, Norman Stewart, George Waldroff, G. A. McDonald, Mrs. Fraser, T. O. Stephenson and August Carlson.

In the evening the principal speaker was the Hon. J. F. Lymburn, Attorney General. He made a vigorous defence of the farmer government, saying it had been extremely efficient and very economical. He spoke of the government's efficiency in closing all financial leaks and said that every government servant in Alberta was now doing a fair day's work for a fair day's pay. He went into the government debt at some length, saying that the government had been criticized because it did not spend enough money, and because, in the abstract, it spent too much. He discriminated between the direct public debt which had increased and the indirect debt which had been reduced. Mr. Lymburn spoke very simply and naturally and interspersed his talk with many humorous stories.

On motion of Mrs. Clark Fraser a vote of thanks was tendered Mr. Lymburn for his interesting speech. Mrs. Fraser said that doubtless to many people in the audience, as to herself, one remark of Mr. Lymburn's, regarding teachers' pensions, would be remembered as worth while, viz, that while the Natural Resources were very valuable, we had one asset in our midst still more valuable, namely, our boys and girls. For them no educational legislation could be too comprehensive, no educational advantage too great.

BASEBALL

A snappy game of baseball was played at the ball grounds here last Friday evening, when Cereal and Chinook crossed bats. The evening was very cool and it was hard for the players to show much pep in the game. However, both teams played good ball for the seven innings. It was a pitchers' battle all the way and the score stood 1:1 up to the last inning, when Cereal scored, making a tally of 2:1 in their favor.

A game was played at Youngstown on Sunday afternoon between that town and Chinook. Judging from the official score, this was a walk-away for Chinook, as at the end of the seven innings played the score stood 20:8 in favor of Chinook.

Chinook ball team evened the count with the Cereal nine by taking them on Tuesday night by a score of 9:4. The Chinook nine had a decided advantage in fielding, and several neat catches and plays featured. Mumford's airtight fielding and Peterson's shoe-string catch were the bright spots of the game. Horne in the box pitched his usual good game and until the last inning decision by the umpire was entitled to a shut out. The boys are hitting the pill, so come and root for the opposition, as they are going to need help.

Coltholme Collections

Mr. Wm. Davis and son, Edward, spent Sunday afternoon at the N. D. Stewart farm.

H. H. Dunster and family were visitors with friends in the Hanna district last Sunday.

W. W. Wilson and family spent last Sunday at the Hutchison home.

Whalea Hobson met with a very painful accident last week, which might have proved serious. While riding on the float, his foot got caught underneath and before his father could stop the outfit he had received severe injuries to his ankle and foot.

N. D. MacKinnon celebrated his birthday last Sunday by giving a small party to a few of his intimate friends. Those present were Mr. and Mrs. J. C. Hess and the Morrison family.

Heathdale Happenings

Mr. and Mrs. Young and son, Bruce, and Mr. Witt were Heathdale visitors on Sunday. They spent the afternoon with Mrs. T. Squires, their old neighbor and friend.

The U.F.A. will hold their next meeting on Saturday evening at Payton school. At this meeting delegates will be elected to attend the Acadia Federal convention to be held at Hanna.

J. Poockens and W. Anderson are busy on the road with the grader these days.

Effect Of Tree Planting

The free distribution of forest trees to prairie farmers by the forest service, department of the interior, has had one marked effect in greatly increasing the number of vegetable gardens and orchards in the prairie provinces. Until recent years comparatively few farmers grew their own vegetables or small fruits. Inspections of the last few years have shown that the great majority of owners of shelter-belts now have vegetable gardens, many are growing small fruits, and an appreciable number are planting fruit trees.

The Farm For The Farm Boy?

Every once in a while some pullman car philosopher comes along with a few suggestions on how to remedy the evils with which agriculture is supposed to be afflicted, and frequently winds up with a peroration containing some gratuitous advice to "keep the boy on the farm."

All of which might be all right if the itinerant solon were fully acquainted with the conditions of the country which he calmly surveys from the window, the conditions of the industry about which he deems so easily and freely, and the times, about which he may, or may not know anything. If, however, he were so well posted he would probably tell the newspaper reporters that he has "nothing to say on the subject today."

Now this question of "keeping the boy on the farm" is not a new one, and it has a good many angles to it, some of which are well worthy of a little reflection by the individual before he decides whether the boy should be kept on the farm, and if so, how to go about it.

The first question that naturally arises is: "Should the boy be kept on the farm?"

This query opens a great realm of speculative thought and examination long before the sequel answer: "How is it to be done?" can be satisfactorily dealt with.

It can be said at the outset, without fear of contradiction, that not all boys are fitted for life on the farm, physically or temperamentally, despite the fact that the farm affords an outlet for the expenditure of a wide range of talents. To try and bind such youths down to a life with the soil is akin to shipping a consignment of flannel vests and fur coats to the niggers of Equatorial Africa, and about as useful.

And what about agriculture itself? Does agriculture need, and can it offer suitable rewards and satisfaction to, all the boys who are born on the farms of Western Canada?

Here again is a question which has an important bearing on the problem of taking care of the future of the rural youth. Fifty years ago a single farmer could only raise enough produce to feed a handful of people. Today, with the use of highly mechanized and highly powered implements, one farmer can feed a host, and the trend in the direction of increasing the productive power of the individual in the realm of agriculture is neither recording a halt nor a swing in the other direction.

If science, combined with improved business management, is going to continue to widen the scope of the individual engaged in agricultural production, the time may come when a very considerable proportion of the lads reared on the land will have to look elsewhere for a vocation.

Then, even more than today, the question of determining the fitness, or otherwise, of the rural boy for bringing forth the fruits of the earth, will assume a greater importance. As has happened in other industries in the flux of time and change, those best adapted by nature and preparation to agriculture will be those who will stay with the industry, and they only. The others will find other fields more suited to their talents and inclinations.

If the foregoing diagnosis of the trend of the times is correct, it is very fortunate that the Western Canadian provinces have within their borders an infinite variety of resources awaiting the application of the initiative and courage bred in our youths, for their recovery and conversion to the services of mankind.

It is also fortunate that coincident with this tendency to reduce the man power on the farm, a marked development is taking place in industrial life in the west which with the development of the resources already referred to, will afford an ever widening outlet for the energies of young manhood.

Progress has always been marked by evolutionary changes of this kind. Usually they bring discomfort to some, but this is inevitable. It is useless to try to stem the forward march. The wise attitude is to try and discern what present day trends may bring in the future and take advantage of the opportunities they may afford.

These are questions which, no doubt, are receiving serious consideration by those responsible for the conduct of the education in rural districts. The wise educationist is not content with taking things as they are for granted, but is looking to the future and making adjustments which the necessity of tomorrow may dictate.

Will Study Canadian Method

Soviet Government Interested In Dr. Barnes' Ice Destruction

Dr. Howard T. Barnes is planning to go to Russia, for a two years' stay, if satisfactory arrangements can be made to take care of his Canadian interests. A commission has been appointed by the Soviet Government for the study

of Dr. Barnes' method of ice destruction and his personal supervision by the engineers in charge has been requested.

As Dr. Barnes now occupies only an honorary professorship at McGill University, Montreal, there will be no difficulty in that quarter, but he has a research institute of ice engineering in Montreal, and the appointment of a principal to replace him there is a duty that must precede his departure.

In Different Form

A diamond, a lead pencil, and a piece of coal are made of the same stuff. These three things are really carbon in different forms, and are just as much as ice, liquid water, and water vapor. All over the world we can find things which look very different, and yet actually, they are just one and the same thing in different forms.

Stunts Planned For This Year

One Man Plans To Walk Across English Channel

It looks as if 1930 is going to distinguish itself as a year of amazing stunts.

Herewith are just a few of the things that carefree men and women are planning to do during the summer.

Fly an engineless glider across the Irish Sea from Holyhead to Dublin. Walk across the English Channel on water boots.

Cross Niagara in a miniature submarine.

Walk blindfold around the top of one of the tallest buildings in Britain.

A young aviator, Mr. Alec B. Trafford, of Birmingham, is to attempt the dangerous feat of flying a glider across the Irish Sea. He has already had considerable experience in glider-flying in Germany and is now at work on the machine with which he intends to make his big attempt.

The man who is hoping to cross the channel on water boots is Mr. J. Hazzard, who has invented an ingenious device consisting of a pair of ordinary shoes attached to the tops of two airtight bags, which he inflates with a bicycle pump. To help him in his 21-mile stroll across the waves he will use a pole attached to another inflated bag. He will obtain refreshment from a floating quick-lunch counter, to be established somewhere near mid-channel.—From Pearson's weekly.

PEOPLE "ALL NERVES"

What To Do If You Find Yourself In This Condition

The sort of thing that specialists call nervous debility is the run-down condition caused by over-work and household worries. The sufferers find themselves tired, low-spirited and unable to keep their mind on anything. Any sudden noise startles and sets the heart palpitating violently. They cannot sleep well at night; their hands tremble and legs seem unable to support them. Such a condition is indeed pitiable.

Doctors of the nerves with sedatives is a terrible mistake. The only real nerve tonic is a supply of good red blood. Therefore the treatment for nervousness and run-down health is Dr. Williams' Pink Pills, which promptly build up and enrich the blood. The revived appetite, the strengthened nerves, improved spirits and new strength which come after a course of these pills will delight every sufferer.

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Preparing Eggs For Storage

The new egg-candling and egg-processing plant at the Pacific Coast Terminals, Limited, is now in operation, preparing eggs for storage and candling them at the rate of 500 cases a day.

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and bowels, they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

Something New In Business

Renting overcoats has proved a successful business for a store at East Ham, London, England, during the recent chilly weather. The rate for use of the garments is the equivalent of four cents a day, and a small deposit is required. Many rent the garments for only one day.

Could Hardly Live For Asthma, writes one man who after years of suffering has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless has been his suffering. This matchless remedy gives sure help to all afflicted with asthma. Inhaled as smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

Value Of Timber Increased

Special timber cruises to establish the true value of timber holdings and the transfer from "wild land" to the timber land categories of certain areas in British Columbia have increased the assessed value from \$18,822,927 in 1927, to \$25,519,710 in 1928.

First-Aid

For all pains and aches, foot troubles, cuts and bruises, or general massaging purposes, Minard's simply can't be beaten.

24 Hours Ends COLDS

You can send the soothing vapor of the pine woods, to the cause of your cold by inhaling Catarrhozone.

Little drops of healing balsams are distributed through the whole breathing apparatus in two seconds.

Like a miracle, that's how Catarrhozone works in bronchitis, catarrh, colds and irritable throat. You simply breathe its healing, fragrant vapor, and every trace of congestion and disease flees as before fire.

Catarrhozone

A Ten-Minute Relief!

No trace of the disease remains after Catarrhozone is used—no more cough or clogged nostrils—no more headache and buzzing ears. Two months' treatment (guaranteed), price \$1.00; smaller size, 50c, at all dealers.

A Blind Soldier-Lawyer

South African War Veteran Practices Profession In Ontario

Those who know him will never think of Colonel Lorne W. Mulloy, blind South African War veteran as sightless. Colonel Mulloy, long known to the British and Canadian peoples as Trooper Mulloy, is an active law practitioner at Iroquois, Ontario.

His pleadings take place largely in Cornwall, and one recalls that the first case he handled was as defending lawyer in a murder trial there.

When Colonel Mulloy came back from England after his Oxford studies, General Sam Hughes, then Canadian minister of militia, found him a post in the Royal Military College where he remained several years. Mulloy was used as a recruiting officer throughout Canada during the Great War.

Then he decided to study law, on the advice of his friend John Goffrey, K.C., of Toronto. The colonel read his law course in one year, which usually takes three years, and the Ontario Law Society called the distinguished soldier and scholar to the bar. He decided to live in Iroquois, which he knew from youth, and bought a fine old stone residence and garden on the banks of the St. Lawrence River at that place, changes in which he directed himself.

Campers Carry Minard's.

Resting Place Of Statesmen

Lord Balfour's desire to be buried on his own estates recalls the variety of attitudes statesmen have adopted towards sepulchre in Westminster Abbey. Bonar Law, a Presbyterian, and Gladstone, a convinced Anglican, both rest in the Abbey alongside the Pitts, Peel and Palmerston—Anglicans all of the Erastian type. Disraeli preferred a country church, and both Salisbury and Lord John Russell chose to lie with their ancestors rather than in the Abbey.

For Scalds Or Burns.—Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinary's fee.

A New Motor Disease

"Driver's heel" is the latest disease. Rough roads, requiring constant working of pedals and controls, are responsible for this trouble, which can be very painful. Doctors with patients suffering from heel ailment are recommending that heel mats of some soft material should be provided by motor manufacturers, particularly for racing cars.

Why suffer needlessly? Douglas' Egyptian Liniment brings quick, sure relief to scald feet, soft corns and warts. Relieves inflammation. Removes proud flesh.

Can Supply Canada's Needs

An investigation made by the Canadian Government Department of Mines shows the sodium sulphate deposits in Saskatchewan containing over 100,000,000 tons of natural hydrous salt, enough to supply the Dominion's requirements and to furnish a surplus for export. One of the chief uses in Canada of this "salt cake" is in the production of sulphate or kraft pulp.

If you do only what you're compelled to do, you're a slave; and the way to set yourself free is to do what you are not compelled to do.

Peace Park At Border

Washington State School Children Subscribe Toward Its Establishment

Thirty thousand school children in the state of Washington, have subscribed ten cents each while their teachers have given twenty-five cents each, toward the purchase of 85 acres of land on the United States side of the border for the establishment of an international park at Blaine, on the International Boundary. The Trades and Labor Council at Vancouver were told by a visiting delegation from Bellingham, Washington, of the donations. It would be the first international park in the world, the delegates said, urging that an equal amount of land be provided on the Canadian side.

"If the same interest is taken on the Canadian side as on the United States side," it was stated, "the project will be a great success."

It was suggested that an annual celebration might be held by both countries at the park on the second of July each year.

Persian Balm preserves and enhances women's natural heritage of beauty. For sheer feminine loveliness it is unrivalled. Tones and rejuvenates the skin, and makes it exquisite in texture. Delightful to use. Smooth and velvety, it imparts a youthful charm to every complexion. Indispensable to all dainty women. Especially recommended to make hands as white as ivory. Delicately fragrant. Preserves and enhances the loveliest complexions.

Around the Corner

Since the stock market crash last October, none of these economic and financial wizards have ventured to cheer us up with the yarn that "good times are just around the corner." It seems that no one has any idea what's around the corner—and never did have.

Use Minard's for Burns.

Mark Twain once said that there were two occasions in a man's life when he could not understand a woman—before he marries her and afterwards.

In Baltimore, Ohio, there is a monument to Adam.

Alertness scores everywhere.

Wrigley's creates pep and energy and keeps you alert.

A 5¢ package may save you from going to sleep at the wheel of your car.

Makes pep

Biggest Floating Elevator

Rouen, France, now has the largest floating elevator ever constructed, it having been delivered by a German company, for reparations account. Weighing nearly 2,100 tons, the device is employed to empty dredger barges, and deposit the material on land, to be filled in. It consists of two large barges, between which is suspended an endless chain, carrying 47 buckets, each capable of holding about 500 liters.

For a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

In early Saxon marriages, the father of the bride delivered one of her shoes to the bridegroom who tossed her head with it as a symbol of his authority.

The Netherlands is believed to be the leading exporter of rayon in the world on a per capita basis.

Heal the Sprain with Minard's.

The promissory note dates back to 2,100 years before the birth of Christ, and was invented by the Babylonians.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an acid, effective yet harmless. It has been the standard antidote for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant, and efficient way to kill the excess acid. The stomach becomes sweet, the pain de-

parts. You are happy again in five minutes. Don't depend on crude methods. Employ the best way yet evolved in the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Foods Stay Fresh Longer This Way

Covered with Para-Sani Heavy Waxed Paper goods that usually stale in a day or so stay fresh for quite a long time. Try it. Get Para-Sani in the handy, sanitary, knife-edged carton at grocery druggist or stationer. For less exacting uses get "Centre Pull" Packs in sheet form.

Progress Of Canada As Seen Through Eyes Of Writer In New York Times

Arthur Elliot Sproule, writing in the New York Times says: "True though it be that we are all undoubtedly getting more and more internationally minded, yet the job is so enormous that, for most of us, only the very biggest foreign events seem able to catch our attention—great things like the naval conference in London and the Soviet attitude toward religion, for example.

So true is this that—possibly because our mental eyes get a trifle out of focus by looking at distant objects—we are often startled to find how little we are seeing of events that lie under our very noses, as it were.

Take Canada, for example. What do most of us know of this great and growing nation that stretches at our very doors. Its progress fully merits the word "astounding," and yet few Americans know anything about it. For instance:

The port of Halifax has increased its tonnage by 40 per cent. in twelve months. The port of St. John, ranking after Montreal and Vancouver in the amount of traffic handled, but first among Canada's winter ports, has the largest dry dock in the world. Moving west, Quebec produces 85 per cent. of the world's supply of asbestos. Water-power projects are being successfully brought into operation, and other great and far-reaching changes have taken place.

Suppose you were asked to name the greatest port on the Atlantic Coast, after New York—would you immediately answer "Montreal"? Yet it is a fact that the harbor of Montreal, 1,000 miles from the sea, is the second port on the North American Continent, New York only being greater. At Saint Ste. Marie the canals carry more traffic than the Suez, Panama and Manchester Ship canals combined.

Winnipeg, the centre of the wheat country, has taken on added importance as the headquarters of a new mineral area, and it may well be that in the future the mineral products of the Province of Manitoba will vie for supremacy with the Province's enormous grain resources.

Further west again, Turner Valley, Alberta, has changed the position of the world to its potentialities as an oil producer.

On the Pacific Coast, Canada possesses vast wealth, notably in her mineral resources, and there are vast gold mines in the mountains.

Passing to world trade, observe that Canada leads all other nations in the production of newsprint, nickel, asbestos and cobalt. She takes second place in the production of wheat and automobiles, and third place in the output of lead and gold. As an exporter she stands sixth among the nations of the world.

According to recently issued trade statistics for the year 1929, Canada holds fifth place in aggregate import and export trade, second place in export, and total trade per capita, third place in favorable trade balance, and second place in favorable trade balance per capita.

There is no need to be wearisome, but it is surely well to face even a few salient facts such as the foregoing. We have quite a neighbor up north!"

Huge Bridge Nearing Completion
The bridge over the harbor at Sydney, Australia, is nearing completion. The structure, costing \$20,000,000, has a span of 1,630 feet, and accommodates a roadway 57 feet wide, four electric tracks and two ten-foot footways. It is estimated that changes in temperature will cause a maximum expansion of 14 inches. The bridge is the world's largest of its type.

Wonder why this reformed client-dancer they're talking about, be so fixed that a fellow won't get his tax bill just when he's saved up enough money to have the house painted?

"Is your dog of pure breed?"
Wine Merchant: "Of course. Do you think I have poured water into him?"—Pages Gales, Yverdon.

W. N. O. 1838

Large Flock Of Swans Seen

Regina Man Reports Seeing About Eighty At Saskatchewan Beach
An unusually fine sight was witnessed recently by a Regina man, J. G. McKechnie, when from a boat off Saskatchewan Beach he watched a flock of 70 or 80 swans sweep down from the sky and alight on the water near him, like a great flotilla of yachts. Mr. McKechnie, though he has lived in the west 38 years, says that never before had he seen any swans at close quarters during the annual migration to or from their Arctic breeding grounds. Yet the swan is by no means uncommon during those periods.

When he noticed the flock first he took the birds for geese, then for pelicans, but as they circled rapidly around in the form of a crescent and alighted practically on one of his boats he was removed as to their being swans. They were about the size of pelicans. None of the birds showed any uneasiness at the presence of the boat, and swam about on the smooth surface of the lake quite unconcerned.

Mr. McKechnie described the call as "most peculiar, calling and answering each other almost like a dog barking, but hoarser." This raised the question among some of those interested in bird lore as to what species of swans did these migrants belong to?

Unless there is indisputable evidence to the contrary, the only swan likely to be seen in these parts, or anywhere else in Canada for that matter, is the whistler. Its larger relative, the magnificent trumpeting swan, is now on the verge of extinction, and few have ever seen it in life. Yet the call heard by Mr. McKechnie did not appear to be the whistling swan so closely as that ascribed to the trumpeter.

Ornithologists who have been questioned on the matter were, however, frankly skeptical, doubting if as many as 70 trumpeting swans existed in all Canada.

Canadian Steamer Was First

Crossed Atlantic In 1833 Without Using Sails

Although some records state the first steamship crossing of the Atlantic was made in 1819, it is believed that a Canadian built ship, sailing from a Canadian port, first made the entire voyage under steam, some years later.

Though nominally steamers, such ships in the time of 1819, relied almost entirely on sails, when crossing the ocean, the engine, at a low rate of speed, being used only when head winds prevailed. This manner of navigating the long distance was a practice for a number of years.

In 1833, the "Royal William," of 150 horse-power, and 1,000 burden, was built at Three Rivers, Que., on the Lower St. Lawrence, for the purpose of plying between Nova Scotia and Cowes, Isle of Wight. She is believed to be the first ship to make the entire voyage across the Atlantic by steam. The occasion marked a new era in trans-oceanic communication, introducing a more powerful and faster class of boat, relying on the use of steam for motive power.

Or Fairly Good

Top windshield is cracked on left side; windshield is scratched where wiper has been; right headlight glass broken; left fender is split; right front wheel is sprung and wobbles; stolen night of February 12. Reward if returned in good condition.

(By Eva A. Tingey)

PRETTY HOUSEWEAR

All Tingey models are created in Paris and sketched by her there. The patterns are made and adapted for American women in New York by American patternmakers.

Fashion seldom wavers in her affection for spots. They have so fresh and trim an effect. They are chic, too, and add an air of charm to the simplest of models.

White spots on a blue ground were chosen for this attractive housewreck. The trims were white. The neck line merging into two front pieces on the bodice has a very slimming effect, which is helped still further by the point on the skirt. Slight shaping of the lower skirt section gives grace and free movement.

Other schemes besides spots could, of course, be used for this model. Plaids, checks, stripes and flowered patterns with contrasting trims would all be good. Almost all standard washing cottons are suitable. Washing silks and rayons can also be used.

This pattern may be obtained in sizes 16 to 20 and 24 to 42. It is ready for immediate delivery. It is full in size of pattern. Address: Pattern Department.

H. R. Mathewson, who has come from a similar position in Toronto, to become general passenger agent of the Canadian Pacific Railway, western lines, at Winnipeg, succeeding R. G. McNeill.

Colorado Grain Growers Coming To Exhibition

Will Be Well Represented When 1932 Show Opens

The growers of San Luis Valley, Colorado, U.S.A., will be well represented at the World's Grain Exhibition, at Regina, 1932, according to reported activities of the Farm Bureau Federation. Among other plans for the improvement of crops the bureau will give special attention to weed control, the securing of pure seed and the "preparation of a valley-wide exhibit at the World's Seed Show, Regina, Canada, in 1932."

The States of Montana will also be represented according to a letter received at exhibition headquarters from A. H. Stafford, commissioner, Department of Agriculture, Mr. Stafford says, "It is the plan of this department to prepare and exhibit grain at your conference in 1932. Will you kindly forward us at this time detailed instructions as to the requirements for establishing such relations with you."

Filling Large Order

Vancouver Lumber Mills Working Overtime To Produce Shingles
Lumber mills in Vancouver are working night and day on the production of 400,000 giant red cedar shingles to cover the 151,000 square feet of roof on the Log Lodge Hotel at Lucerne-in-Quebec. The order, placed by the Lucerne-in-Quebec Community Association, Limited, with Alexander Murray Limited of Montreal, is said to be the largest single purchase of hand split shingles in the history of the lumber industry.

"There, now," said the suburbanite to his wife, "you've ordered flower seeds that take two years to bloom."

"Well, that's where you're all wrong," she said. "This is last year's catalogue."

It is estimated that in Chicago one marriage out of every five ends in divorce. We may be wrong, of course, but we have a feeling that the other four end in early widowhood.

At least one in every five persons in Germany now has a savings bank account.

Canadian Forest Growth Could Be Stimulated By Scientific Management

Convenience In The Poultry House

Work Should Be Made As Easy As Possible

When building a poultry house it is a matter of importance to see to it that it is not only located at a point easy to reach, but also that it shall be so arranged that the work of attending to the birds be made as easy as possible. The more convenient it is to do the work about the poultry house the surer it is that it will be done.

As the women of the farm usually look after the poultry, the work should be made as easy as possible. If the distance to be covered in going back and forth to the poultry house is twice as far as it need be the amount of extra walking thus involved may have the effect of adding drudgery to the task. The new building No. 132, of the Department of Agriculture, at Ottawa, "Poultry House Construction," goes fully into the question of planning, and makes the observation that not only should the house be accessible, but the internal arrangement ought to be such that the work may be done with the least amount of labor. Among other suggested conveniences is the gate that swings both ways. The feeder may be carrying two pails of water or feed, a gate that swings either way may be opened without stopping to set down the pails. A harrow load of gravel, or the laying of a plank, will enable one to pass over a wet place dry-shod.

Another recommendation is the providing of a feed box in which supplies may be kept close to where they are needed. In poultry keeping, as in other farm work, labor is an important item, and in the building and equipping of a poultry house every consideration should be given to means that may be taken to reduce labor.

Land In Good Shape

Irrigated Area In Southern Alberta In Fine Condition

Irrigation carried out during 1929 was the biggest in the history of Southern Alberta, and as a consequence the land is in fine condition now, according to P. J. Jennings, supervisor of irrigation in the Calgary district office of the Dominion Water Power and Reclamation Branch. "Without exception, all the large irrigation projects in Southern Alberta used large quantities of water last fall," he said, "and in consequence their irrigated lands were in good condition this spring."

Feed As They Go

Many of the birds that migrate by day travel slowly and feed as they go along. The cliff swallow is said to average twenty-five miles a day for the first twenty days of its two thousand, five hundred mile flight from winter to summer home, and increases this to sixty miles a day at the end of the journey, doubtless feeding to a greater extent during the early stages of the trip.

"The spelling books of fifty years ago were the best," writes an old-timer to the Toronto Globe. "The young folks of today don't know how to spell."

An estimate of the total forest production of Canada for 1928 has just been completed by the forest products branch of the Dominion Bureau of Statistics. The estimate includes all the products of operations in the woods, the unmanufactured materials cut in Canadian forests during the year.

An estimate has also been made of the extent to which the forests are being depleted annually in the process of exploiting these materials. For this purpose converting factors based on actual measurements have been used. Each cubic foot of wood represents in cubic feet the quantity of standing timber that must be cut in the forest in order to produce one unit of the material in question, based on the total cubic contents of the tree. By the use of these factors it has been ascertained that the total forest production of 1928 involved the cutting of 2,988,038,430 cubic feet of standing timber. This constitutes only the annual depletion for use and to it must be added the volume of material annually destroyed by fire, which exceeds 900,000,000 cubic feet of merchantable timber and young growth on 1,200,000 acres. Insects and fungi destroy annually at least 800,000,000 cubic feet to the annual drain on the forest resources of considerably more than 4,788,000,000 cubic feet.

A total depletion of 4,788,000,000 cubic feet per annum does not necessarily imply that the total resources are reduced by that amount every year and the supply will therefore be exhausted in forty-seven years. Estimating the probable duration of a supply of forest products is not the matter of simple arithmetic. The rate of utilization is far from constant. It tends to increase with the discovery of new uses for wood, the increase in population and the increase in the demand for forest products from other countries whose supplies have been reduced to a greater extent than Canada's.

On the other hand, there is a steady increase in volume taking place in all healthy stands of timber due to annual growth. By the application of scientific forest management this annual growth can be stimulated and could be made to take place over the entire area of potential forest land, it is believed.

Preparing To Ship

Fish By Airplane

Commercial Air Lines Around Great Lakes Will Speed Up Transportation

Other than flying fish will soon take to the air in changing the habit from the Great Lakes to American cities.

Commercial air lines around the Great Lakes, both in Canada and the United States, are preparing to transport whitefish, pickerel and other edible varieties of fish, from the shores of the Great Lakes to the railroad for quick shipment.

It is said that the movement of fish from inland lakes to railway contact by air has been successfully and economically accomplished in other localities and that the nearest industry of the great northwest is fishing, this outcome is anticipated.

Seeking Information

"John," said Mrs. Dumbbell, "It says here the Russians and Chinese exchanged shots."

"Well," he grumbled, "what of it?" "Well," she replied, "if they are friendly enough to exchange things with each other the war over there can't be very serious, can it?"

Foreman—"Well, everything all right?"

Night Watchman—"Yes, I have not done so bad for the first night. I've checked everything off, and there's only one thing missing—the steam roller."

"The doctor told me that people either die of my complaint, or become idiots."

"Doctors don't always know. You have not died."—Pages Gales, Yverdon.

PRESS DELEGATES FROM "DOWN UNDER"

Members of the New Zealand delegation to the fourth Imperial Press Conference, to be held in London, England, in June, are shown photographed in Victoria, B.C., with members of the City Council, who tendered an official welcome to them. The centre of the front row is Mayor Ascombe, who officiated the civic luncheon in honor of the visitors, who were also entertained to dinner by the Government of British Columbia with Premier Tominie presiding. The New Zealanders are crossing Canada by Canadian Pacific lines and will sail from Montreal on the "Duchess of Bedford," on May 16.

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling? This indicates a torpid liver. Headache, Dizziness and listlessness surely follow. You must stimulate your lazy liver, start the bile flowing with Carter's Little Liver Pills. They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and not habit forming. They are not a purgative that cramps or pains, unpleasant after effect following, on the contrary a good tonic. All Druggists 25c and 75c red pills.

WORLD HAPPENINGS BRIEFLY TOLD

Sale of the Crown Jewels of the Ottoman empire, valued at \$300,000,000 was forecast to raise money to relieve Turkey's financial crisis.

A movement is under way to make the Watertown, N.Y., airport an official port of entry for Canada. At present pilots must fly to Malone to obtain clearance papers.

A protocol putting into effect the Young Plan has been signed at the French foreign office by Premier Briand, and the foreign ministers of Great Britain, Italy and Belgium.

Captain C. D. Barnard, pilot of the "plane in which the Duchess of Bedford flew to Capetown, South Africa, and return, is planning to fly around the world in 30 days.

All school uniforms throughout China must hereafter be made of native cloth in order to encourage home industry, according to a circular order of the Ministry of Education.

The Montreal Star says on good authority that a representative British, Canadian and United States group is negotiating to purchase Labrador for \$100,000,000. The proposal will be submitted shortly.

An order-in-council issued by the Department of Agriculture, under the authority of the animal contagious diseases act, prohibits the importation into Canada of parrots, parakeets, cockatoos, macaws, lorries, and love birds.

It is learned in Tokyo that at London, England, a contract has been concluded with British and United States bankers for a bond issue of approximately 250,000,000 yen (nearly \$125,000,000) to convert a loan falling due in 1931. United States and Britain were said to be about equal.

Installation of radio-beacons to facilitate night flying is expected at Forest, Manitoba; Regina, Saskatchewan; Morse and Bassano, Alberta, according to an announcement made by Inspector D. McLean, of the Civil Aviation branch. With the installation of these beacons night flying under all weather conditions will be possible.

Business Is Growing

Deep-sea arrivals at the Port of New Westminster during March numbered 23 vessels compared with 17 in March, 1929. During the first three months of the year 60 deep-sea vessels with a gross tonnage of 318,453 registered inwards at New Westminster compared with 45 vessels of a gross tonnage of 266,017 during the similar quarter of 1929.

"Did your girl friend enjoy the art exhibit?"

"No, she couldn't find a mirror in the whole gallery."

The Mohammedan Law

Egyptian Judge Rules Women Do Not Have To Be Educated

Girls having equal opportunity with their brothers for a public school and even a college education, should be thankful they live in a country of religious liberty, says a newspaper writer.

A mother in Cairo, Egypt, petitioned the court for an order compelling her husband to make financial provision for their daughter's education. The judge declined to issue the order on the grounds that Mohammedan law does not require a Moslem to educate the women of his family, and adds as his personal opinion that women should not be educated.

The Cairo judge, who places mental subjection, the most abject form of slavery, on a sex basis, would find himself sitting on a keg of dynamite instead of a bench in lands of growing sex equality.

The ideal state is the one in which opportunity for public service would be limited only by the ability of the individual to perform such service.

Miss Constance A. Harvey, of Buffalo, newly appointed foreign service officer, is assigned to Ottawa as American vice-consul. Miss Harvey received her appointment as the result of an examination which inquired into the matter of mental fitness, not of physical conformation.

Fashion

(By Eva A. Tingey)

FRILLS AND FURBOWS

All Tingey models are created in Paris and designed by her there. The patterns are made and adapted for American women in New York by American patternmakers.

Even though we won't go back (it is to be hoped) to trailing them in the mud, we have returned to a certain swiftness about the ends of our skirts. And it's really rather lovely to be able to founce about, don't you think?

Here's a lovely little frock with a heap of funniness to finish it. It can be belted where you please, too, natural line or lower.

Midnight blue moire was chosen for this model, with dainty collar and cuffs of cream lace. The frills were plot-edged.

Maroon, satin, crepe de chine, georgette, besides numerous printed effects could be chosen for this model. If the model is preferred without collar and cuffs, the V-neck can be finished with a bow of self material.

This pattern may be obtained in sizes 16 to 20 and 24 to 42. It is ready for immediate delivery. It is hand cut.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Five Powers Sign Reparations Plan

Commission Disappears and World Bank Will Soon Be in Action

The Young plan for payment of reparations, reducing Germany's obligations for damages caused during the world war from something like \$25,000,000,000 to about \$9,000,000,000, has gone into effect.

A protocol registering the decision of The Hague conference, which adopted the plan January 2, was signed by the ambassadors of Great Britain, France, Belgium, Italy and the French Minister of Foreign Affairs, after a text signed by the French Foreign Minister, Aristide Briand.

The first consequence of this act, which modifies for a second time the reparations machinery provided by the Versailles treaty, will be the disappearance of the reparations commission which, in co-operation with other bodies, has taken charge of payments under the Dawes plan.

The second will be the beginning of functioning by the bank for international settlement at Basel, Switzerland.

The third will be the issuance of \$300,000,000 in reparations bonds, two-thirds of that going to creditor nations and the other third to Germany for internal requirements.

Two Tested Recipes For Salad Dressings

Now that salads are the order of the day, really good recipes for salad dressings will be welcomed. A salad is often made or marred by the pliancy of the dressing used, so that tested recipes are very desirable. Some are preferred for a few minutes and others a cooked dressing, we give two recipes, both of which we know will please.

SALAD DRESSING (Uncooked)

Two eggs beaten until light, 1/2 teaspoon salt; 1/2 teaspoon mustard; 1/2 cup Eagle Brand Condensed Milk; 1/4 cup vinegar. Beat the first four ingredients vigorously for a few minutes add the vinegar, stir well and set aside for a few hours to thicken. Excellent for fruit or vegetable salad. Will keep for weeks. For Russian dressing add Chili sauce to taste.

SALAD DRESSING (Cooked)

Half a tablespoon salt; 1 teaspoon mustard; 1 tablespoon flour; 1 tablespoon butter; 1/2 cup Eagle Brand Condensed Milk; 1/4 cup vinegar; 1 egg. Mix dry ingredients, add slightly beaten egg, butter, milk, water and vinegar. Cook until thickened. Strain and cool. Whipped Borden's St. Charles Evaporated Milk, or cream, may be added before serving if desired. Yield, 1 cupful.

"If, as you admit, you were three miles away digging potatoes when this man was arrested for speeding, how can you testify that the car was going at the most only 20 miles an hour?"

"Judge, Ah used to own that car!"

Children of London recently attended a lecture on the home life of ancient Egypt and were shown balls and rattles which amused Egyptian babies of 2000 B.C.

Colombia exported 2,863,171 bags of coffee last year.

Coffee is made under heavy steam pressure in a French inventor's pot.

To go forward is important; to go straight is more important.

PALPITATION

Throbbing of Heart After the "Flu"

Mrs. J. Cunningham, Sault Ste. Marie, Ont., writes:—"Last February I had a severe attack of influenza which left me with palpitation and throbbing of the heart."

"I felt very weak and tired so began to take

MILBURN'S HEART NERVE PILLS

and used about six boxes and have found them help me a great deal, and am very thankful for having found such a good medicine."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Reward by Admiralty

Englishwoman Gave Valuable Information Regarding Movement Of Enemy Ships

A woman who sat for four hours by her telephone transmitting to Admiral Sturdee information which proved of great importance, in the Battle of the Falkland Islands, arrived in London, England, recently, with her husband.

She is Mrs. Creamer, formerly Mrs. R. S. Felton, the daughter of an English professor, who settled in the Islands, which are about two hundred and fifty miles from the Mainland of South America.

"Mr. Creamer told a press representative the story of his wife's presence of mind and initiative which resulted in the sinking of three German ships, and earned for her a silver salver, which was presented by the Admiralty, and the Order of the British Empire.

"On December 8, 1914," Mr. Creamer said, "my wife was at home, in her farmstead, at Fitzroy, with her three children, two maids, and a boy servant. Her maids reported to her that they had seen from a hill near three German ships making for Fitzroy.

"Two of these were the Baden and Santa Isabel. The third vessel is believed to have been the Sedulitz — either a hospital ship or a transport."

"She immediately ordered the maids to saddle two horses, and to ride in relays to the top of the hill, and report to her every few minutes the ships' movements. Meanwhile, she telephoned to the authorities, at Stanley, and her reports were rushed to Admiral Sturdee.

"She sat there for four hours, with her baby boy in her arms, while her messages directed the movements of "Bristol" and of the armed liner "Macedonia," which set out in pursuit of the Germans.

"The enemy tried to steam at full speed, for safety, but the information which reached Admiral Sturdee, minute by minute, enabled the British to follow them. In a few hours, the "Bristol" and the "Macedonia" had caught and sunk the ships.

Rivalry in Building

Plans Are Frequently Changed After Construction Has Started

The race to see which country shall build the largest ocean liner suggests the competition in New York to erect the highest skyscraper. It is known that plans for some of the tall structures that are now changing the Manhattan skyline, were successively altered, even after construction had begun, in the light of news of competitors' intentions.

According to word from London, the White Star Line has adopted an entirely new set of designs for its giant "Oceanic," which is to be of 65,000 instead of 60,000 tons, as originally planned. It will be the world's first 1,000-foot vessel. The "Majestic," now the longest, is 815 feet. The "Leviathan" is 807, but the "Leviathans II. and III.," to be built by the United States Lines, will be 965.

Proved Her Greatness

Late Emmeline Pankhurst Was Martyr To Good Cause

What remains unforgettable is that in her own person Emmeline Pankhurst bore the burden of a martyrdom that would be incredible to us today if we failed to realize that it happened in another world because she helped to make it so. Whether she addressed thousands from the platform or led twelve women into the horrors of Parliament Square, whether she marched at the head of a procession five miles long, or fought single-handed in the dark solitude of her prison cell, she gave always that impression of greatness which is inseparable from possession of unshakable conviction and invincible courage, and which makes the martyr of all the ages.

She—"Now that we're engaged, dear, you'll give me a ring, won't you?"

He—"Yes, certainly, darling. Er—what's your number?"

At a rough estimate the animals in the London Zoo represent a total value of about \$175,000, the Indian rhinoceros being one of the most valuable, costing more than \$5,000.

Silver fox farming is being introduced into Norway.

Hawaii has practically no unemployment.

The automobile speed record in 1903 was about 69 miles an hour.

Nearly 2,000,000 tons of rice were produced in Manchuria last year.

Crickets hear with their elbows.

SUNDAY SCHOOL LESSON

MAY 25
JESUS DESCRIBES THE FUTURE OF THE KINGDOM

Golden Text: "Take ye heed, watch and pray; for ye know not when the time is."—Mark 13:33.

Lesson: Matthew 24:1 to 25:13.

Devotional Reading: Isaiah 55:1-3, 6-8.

Explanations and Comments

The Parable of the Wise and Foolish Virgins, 25:7-13.—The Kingdom of Heaven Jesus likened to ten virgins who went forth with their lamps to meet the bridegroom. Five of them were wise (prudent), and carried oil in their oil vessels, but five were foolish (imprudent), and took no extra supply of oil.

While the bridegroom tarried they all slept. There is no hint of reproach in this statement: the bridegroom might tarry a long time. Midnight came, and the approach of the bridegroom was announced. All the virgins arose and trimmed their lamps preparatory to going forth to meet him. The foolish ones then found their lamps were going out, and begged the wise ones to share with them their oil. But the wise virgins refused lest there might not be enough for them all, and counselled them to go out and buy oil.

While the foolish virgins went forth to buy their oil the bridegroom came; those that were ready went in with him to the marriage feast, and the door was shut.

A little later the foolish virgins arrived and begged to have the door opened. "Verily I say unto you, I know you not," was the answer they received.

Watch, therefore, for ye know not the day nor the hour. He not found unprepared. "It is not enough to have a lively zeal for a while; we must have, in addition, a perseverance that never tires."—Calvin.

A Growing Industry

Production From Inland Fisheries In Manitoba Shows Great Gain

While agriculture, the basic industry of Manitoba, together with manufacturing, mining, and other industries has advanced substantially in the province in recent years, the production from the inland fisheries has probably shown the greatest gain. In the past five years the fisheries production has increased more than 100 per cent. In 1924 the market value of the fish caught in Lake Winnipeg, Manitoba, Winnipegosis and other lakes was \$1,232,000, while last year it was \$2,634,000. In 1929 the commercial fishermen of the province caught 33,000,000 pounds of fish, a record for Manitoba, with a market value of \$2,634,000.

Vancouver Port Busy

Commercial shipping entering the Port of Vancouver during March showed marked activity, the net tonnage being about a million. The movement showed 1,909 arrivals with a tonnage of 966,288. Deep sea arrivals totalled 106, with a net tonnage of 408,856.

Bring New Rooms to Your Home with Gyproc

A WORK-ROOM for you—a play-room for the youngsters in the basement. An extra bedroom or two in the attic. These are now possible in your home at little expense.

The new Ivory coloured Gyproc Wallboard that does not burn and needs no decoration (when panelled) will give you additional space in your present home.

Easily and quickly applied, structurally strong, it provides fire-safe walls, ceilings and partitions.

Your dealer's name is listed below. Consult him today and ask for full information regarding Gyproc Wallboard or write for interesting free book "Building and Remodelling with Gyproc."

A Lucky Catch

Senary Receives \$20,000 For Saving Life Of Prince At Belgrade

One of King's Alexander's gigantic guardsmen recently was given an indefinite leave of absence after receiving a reward of 100,000 dinars (nearly \$20,000), for having quite inadvertently saved the life of the 2-year-old Prince Tomislav, the second son of the King.

The Prince was playing in the apartments of his mother, Queen Marie, on the second floor of the palace, at Belgrade, when suddenly he fell from a window. The senary, who was passing at the moment, received the full weight of the child on his shoulders. The Prince clutched the senary around the neck and slid to the ground unhurt, but the burly guardsman was knocked unconscious and crumpled to the ground.

Poultry Going To England

A trio of Brandon birds, having high egg production records, have been shipped to Ottawa to be trained and fitted for upholding Manitoba's reputation for high production poultry at the Crystal Palace, Sydenham, England, when the fourth world's poultry congress assemblies poultry leaders from all parts of the world next July.

One-sixth of the world's supply of coal is lying almost dormant in Alberta, Canada.

BUDGET ADOPTED BY MAJORITY OF TWENTY-EIGHT

Ottawa, Ont.—The final budget of the 10th Parliament of Canada passed the House of Commons by a majority of 28 votes. Two members of the Conservative Party and one member of the U.F.A. group voted with the government.

Supporters of the government lined up solidly behind the fiscal proposals brought down by Hon. C. A. Dunning, Minister of Finance, May 1st.

The vote stood: For the budget, 114.

Against the budget, 86.

Opposed to the budget were the members of the Conservative party with the exception of Finlay MacDonald, member for Cape Breton, South, and T. E. Simpson, member for West Algoma. Both of these Conservatives represent constituencies in which the iron and steel industry is prominent. They had previously announced that they favored those provisions of the budget which they considered advantages to their constituencies, and consequently they supported the government.

L. W. Johnstone, Conservative member for Cape Breton, North-West, had previously announced that he favored provisions of the budget which he considered advantageous to the iron and steel industry. Belonging, however, he did not vote. L. H. Jelliff, U.F.A. member for Lethbridge, Alberta, supported the budget. Crowded galleries looked down on the stirring scenes which featured the final day of budget debate. Shortly after six o'clock the house had defeated the sub-amendment and amendment to the budget which were offered by the Progressive group and the Conservative opposition respectively.

The sub-amendment, sponsored by W. R. Fansher, member for Last Mountain, Sask., was snuffed under by a vote of 177 to 19. Its entire support came from the Progressive, U.F.A., and Labor groups in the house.

The Conservative amendment, which was moved by Hon. T. E. Bennett, Opposition leader, met with a similar fate by a majority of 60 votes. In this case the division stood: For the amendment, 64; against, 124.

May Increase Salaries

Postmaster-General Will Try To Secure Higher Pay For Postal Workers

Ottawa, Ont.—Further attempts will be made to find a way to increase salaries of postal workers, Hon. Peter Veniot, postmaster-general, promised officers of the United Postal Employees of Canada after a conference extending over three days. Mr. Veniot pointed out that his previous attempts to secure increases for the men have been unavailing owing to decisions of the civil service commission, but that consideration would be given to alternative methods of attaining the desired result.

Indian Flier Reaches England
Croydon, England.—The Parsee Indian flier, R. D. Tata, arrived by aeroplane alone from India, after a nine-day flight in an attempt to win a prize of 500 pounds sterling offered by the Aga Khan for the first solo flight by an Indian from India to England. The best times made by other contestants were 17 and 23 days, respectively.

Pay Tribute To Explorer
Oslo, Norway.—Norway recently paid official tribute to Dr. Fridtjof Nansen, whose sudden death occurred May 13. The Storting, or legislature, held an extraordinary meeting at which President Hambro voiced the country's praise of the great explorer and humanitarian. The Storting's offer to pay the explorer's funeral costs was accepted by the Nansen family.

Naval Parley Was Costly
London, England.—Cost of the London naval conference to the British public funds was almost a thousand dollars a day. Figures made public show the complete expenditure was £17,600 (about \$85,000), or an average of £182 (about \$910) daily for a period of 91 days.

Plans Are Questioned
Ottawa, Ont.—Proposed construction of a cold storage plant and fish wharf at Vancouver by the Vancouver Harbor Commissioners is the subject of a series of questions placed on the order of business of the House of Commons by Hon. H. H. Stevens (Cons., Vancouver Centre).

Delegates To Labor Conference Named

Selections Have Been Announced By Hon. Peter Heenan

Ottawa, Ont.—Gerald H. Brown, assistant deputy minister of labor, and Dr. W. A. Riddell, Canadian advisory officer resident at Geneva, will be the two official Dominion Government delegates to the 14th annual meeting of the International Labor Congress meeting at Geneva, on June 10 next.

Mrs. R. F. McWilliams, of Winnipeg, has been named to accompany three Eastern Canada men as technical advisors to the official delegates. Announcement of the selections was made here by Hon. Peter Heenan, Minister of Labor.

Major J. H. Roaf, chairman of the British Columbia division of the Canadian Manufacturers' Association, is to attend the congress as representative of the employers of labor while Tom Moore, president of the Trades and Labor Congress of Canada, will represent the workers.

Aviation Valuable To Canada

More Development Is Urged By Dr. W. R. Boyle

Saskatoon, Ont.—That Canada will gain more by the development of the aeroplane and radio than any other country in the world, was the statement issued by Dr. W. R. Boyle, principal of the physical science division of the new national research laboratories at Ottawa.

He emphasized the value of the aeroplane and radio in bringing together certain parts of our country, with its wide stretches of unoccupied territory would remain isolated and inaccessible without the aid of these two developments of science. Dr. Boyle said that particular attention was being paid to aeronautics at the research department at Ottawa.

Workers' Bill For Debate

Measure Has Been Referred To House Of Commons

Ottawa, Ont.—A measure respecting employment of Canadian workmen on Dominion Government contracts was referred in the House of Commons to the committee on industrial and international relations.

The sponsor of the bill, Dr. J. J. E. Guerin, (Liberal, St. Ann), informed the House that the measure was of serious interest to labor, especially in the City of Montreal. In brief the purpose of the bill, he proceeded, was to provide that there should be no age limit in respect to Canadian workmen seeking employment on government contracts.

Will Holiday In Europe

Successful Western Farmers Going Back For Short Time

Toronto, Ont.—Fifty-five farmers, mostly from Alberta, and made up of Ukrainians, Finns and Central Europeans, have arrived here on their way to Europe. Travelling in ten automobiles, men, women and children, some of the latter having been celebrating the land of their birth, are going back for a holiday tour after successfully establishing themselves on the land in Canada.

Starting from Edmonton, the party motored over a route carrying them through parts of the United States then crossing again.

Would Use Old Law

Paris, France.—With a view to making France unhealthy for loafers and petty criminals, a bill has been introduced in the chamber which invokes a law of 1885 to the extent of imposing the choice between expulsion and permanent confinement at hard labor for any person who, having already spent at least six months in prison, shall have been convicted a second time.

For Scott Centenary

London, England.—An appeal to Scotsmen throughout the world to subscribe five thousand pounds sterling (nearly \$25,000), towards a suitable and dignified way of commemorating the centenary on September 21, 1892, of Sir Walter Scott, the great novelist, has been issued by the Duke of Buccleuch, president of the centenary committee.

Early Wheat In Alberta

Edmonton, Alberta.—Many of the early sown wheat fields of central Alberta are showing green grain of excellent color to the height of two and three inches. According to the monthly crop report of the Journal, fully 50 per cent of the wheat is showing green and all is germinating evenly.

Britain Has Refused Demands Of Arabs

Delegates From Palestine Told Proposals Were Unacceptable

London, England.—The British colonial office issued a statement declaring that the demands of the Palestine Arab delegation, which has been in London discussing the future of their fellow-countrymen, for constitutional changes were "wholly unacceptable."

At the same time the Arab delegation, which recently declared it had reached a deadlock in the negotiations, announced it would leave for Palestine on May 23.

The colonial office statement said the government had had to reject the delegation's proposals could not be accepted "since they render it impossible for His Majesty's government to carry out their obligations under the mandate."

RECONSTRUCTION OF C. N. R. WILL BE POSTPONED

Ottawa, Ont.—Without a division and with very little debate the Senate gave three readings each to the bills restoring the natural resources of Manitoba, Saskatchewan and Alberta to those provinces. They previously had been passed through the House of Commons as government measures.

Hon. N. A. Belcourt, acting government leader, in supporting the bills, said the provinces had been dealt with generously and fairly. It had been the government's desire to grant the provinces as wide power as possible and he was impressed with the spirit that animated the proceedings leading to the agreements.

Hon. W. B. Willoughby, Conservative leader, said the natural resources had been an acute question in the west for years, but he believed it had been settled satisfactorily. He referred to the fact that Alberta and Saskatchewan had been given the right to appeal to the courts on constitutional issues. The Manitoba Act, he pointed out, had been passed by the Privy Council, but neither of the others had been interpreted judicially.

Hon. A. B. Gillis reviewed the past history of the natural resources question in the west. Withholding of the resources under the 1905 incorporation had been disastrous to the provinces, and the present settlement was a complete justification of the stand taken by Sir Frederick Haultain when premier of the Northwest Territories. The provinces, he said, had been forced into direct taxation, and Saskatchewan alone now has a debt of \$70,000,000. If the resources had been given to the province in 1905, the sale of land would have offset the present debt.

NEW HIGH COMMISSIONER

Hon. Vincent Massey, envoy to Washington, who has been named to succeed the late P. C. Larkin, as high commissioner for Canada in London.

Papers Resent Action Of Scotland Yard

Protest Against Method Employed In Reference To Leakage Of News

London, England.—In connection with the probe into the leakage of news from government sources connected with the arrest of Gandhi in India, the Newspaper Owners' Association has raised its powerful voice against certain sections of the Official Secrets Act of 1920, under which the detectives secured their warrants to invade the home and question the newspapermen. The association has adopted a resolution regretting the government action and calling it unjustified interrogation of a journalist who collected his news by a legitimate and open method. The resolution expresses concern for the freedom of the press and demands amendment of the act in the public interest. A copy of the resolution was forwarded to Prime Minister Ramsay MacDonald.

Will Hold Opium Conference

League Of Nations Council To Meet

Geneva, Switzerland.—Measures for strengthening the forces fighting the illicit opium traffic by calling up help from the "victim" countries were taken by the council of the League of Nations.

The council tentatively set December 1 for holding an international opium conference at which the legitimate matter for consideration will be a proposal to limit the world manufacture of narcotics to the world's medical and scientific needs.

To Broadcast Story

Montreal.—The complete story of the approach of the R-100 to Canadian shores, her passage overland to Montreal and her attachment to the mooring mast at St. Hubert airport, as well as the reception ceremonies, will be simultaneously broadcast by 20 cities in Canada.

HER MAJESTY THE QUEEN AND HER GRANDDAUGHTER

Queen Mary and the members of the royal family have been once again brought strikingly into the spotlight of public esteem by the biography of her majesty by Charlotte Cavendish, recently published in London. Photographs above of her majesty and Princess Elizabeth, granddaughter of the Queen, are by Marcus Adams, of London, England, and are reproduced here through courtesy of Toronto members of the Photographers of America.

Chinese Stage Battle

Winnipeg Is Scene Of Riot Between Oriental Factors

Winnipeg, Man.—Axes and baseball bats were wielded in Winnipeg's Chinatown as two Oriental factions clashed in riotous street warfare. Three Chinese were so seriously injured that they were taken to hospital, while numerous others were being attended at their homes. Seven Orientals are under arrest.

Rioting broke out shortly after midnight with two-score members of opposing political factions milling in the fray which began when two Orientals engaged in combat. From stores and residences in the surrounding area, within a block or two of the city hall, poured Chinese armed with axes, sticks and baseball bats. Several were knocked unconscious in the mob-chaos.

Police arrived when the riot was in full swing and the battlers dispersed within a few moments, leaving injured men on the road and in the gutter. Fleeing combatants were arrested and the more gravely hurt were hurried to hospital. Condition of the three wounded men was reported as showing improvement.

Survey Of Natural Resources In B.C.

Information Is Being Sought On Peace River Block

Victoria, B.C.—Under an agreement between the British Columbia government and the Canadian government, the Canadian National Railways and the Canadian Pacific Railway, announced by Premier S. F. Tolmie, a systematic natural resources survey of the Peace River block will be launched almost immediately and carried on all summer.

The survey organization under Major C. B. Criddle, which conducted the Pacific Great Eastern Railway survey of last summer, will handle the Peace River block investigation also.

The government and the two railways will share the cost of the work jointly as before.

"We need this information on the Peace River block before we can intelligently deal with the future of this great area of about 3,000,000 acres," the premier announced.

SENATE AGREES ON RESOURCES BILLS FOR WEST

Ottawa, Ont.—It is not the intention of the government to proceed with the financial reconstruction of the Canadian National Railways this year, Hon. T. A. Crerar, Minister of Railways, told the parliamentary committee which examined the estimates of the National system here. The government had proposed to introduce a bill dealing with the amalgamation of the various constituent companies, but no progress having been made previous to the Easter recess, it was doubted if that bill would now be dealt with in view of the approaching dissolution of parliament.

"I frankly confess," said Mr. Crerar, "that, assuming my duties as Minister of Railways in February, I haven't been able to get a clear idea of what is involved beyond the fact that it is a tremendous task."

"I doubt if the amalgamation will now be proceeded with, but it should be done next session."

Sir Henry Thornton, president of the C.N.R., informed the committee that as far as the railway was concerned all the investigations had been made in connection with the financial reconstruction and the company's recommendations were ready. Mr. Crerar, however, had had no opportunity to enquire into what was an exceedingly complicated problem. The situation now was one of simply determining what the government wanted to do. The executives of the C.N.R. had submitted their recommendations this year.

The problem of financial reconstruction had been under intensive study for the past six years and he did not suppose that any more complicated task had ever been undertaken on account of the large number of records, mortgages, securities of different terms and rates of interest. These had all been finally catalogued and straightened out. It was now at the pleasure of the government and the will of parliament. The company itself was prepared to go ahead with the matter.

The re-financing scheme did not involve the disturbance of existing issues.

BRITISH PREMIER SATISFIED WITH NAVAL TREATY

London, England.—Prime Minister Ramsay MacDonald told the House of Commons the primary reason for the London naval conference which, he declared, was the United States' program of naval construction.

"We were perfectly agreeable that the United States should build to parity," said Mr. MacDonald, "but what had not been settled was: 'What was the program of parity?'"

"Many thought it was necessary to pursue the Washington agreement any further," continued the prime minister, "and they said: 'Why should we worry about the force America is putting upon the waters?'" While this view was most attractive it was very unsound.

"If the whole world occupied to America the same happy relations that we did, and do, it would be a sound view, but, unfortunately, that was not the case. Whether we took notice of what America was doing or not, other nations would, and with the building of these other nations we are concerned."

"Consequently we were forced to the conclusion that the foundation of real security was an international understanding between America and ourselves, such as we were able to effect at the London conference. That piece of work has been done."

"The spectacular effects would have been much greater if the London conference had not been from the beginning, only a three-power conference which would have been a high seas conference, pure and simple, between the United States, Japan and ourselves."

"But Britain could not obtain security by an agreement between the three powers only."

Washington, D.C.—Two gray-haired admirals of the United States navy, each with upwards of a half-century of distinguished service behind him, disagreed pointedly over the merits of the naval treaty in London.

Sounding the first note of protest from an official quarter, Rear Admiral Hilary P. Jones, long an outstanding figure among navy men, told the Senate foreign relations committee that he not only disagreed with many of the decisions of the London conference, but thought a different settlement would have been entirely possible.

At the same time Admiral William V. Pratt, commander of the battle fleet, was advising the Senate naval committee that the treaty suited him, that he was satisfied to have fewer eight-inch gun cruisers than the navy previously had asked, and that in any case the United States delegation at London got the best it could.

New Submarine Launched

Is First Of Its Class In The Royal Navy

Chatham, England.—The submarine, "Rainbow," 1,475 tons, first of her class in the Royal navy, was launched. There are three other submarines of this class and 12 others in hand. This lot of 16 being designed to replace 36 submarines which will automatically become obsolete by the end of 1932.

If no further submarines are laid down these 16, the British submarine strength will be cut from 50 to 30 at the end of 1932.

The naming ceremony was performed by Mrs. Addison, wife of Vice-Admiral Addison, director of dockyards. After a religious ceremony, a bottle of Australian burgundy was broken over the stub bow of the vessel and she slid into her element.

No Change In Surveys

Ottawa, Ont.—Return of the natural resources to the western provinces, which is expected to bring an arrangement between the Dominion government and the provinces concerned regarding the continuation of aerial forest protection work in the west is having no immediate effect upon the air fleets of the government. For this year extensive plans are underway for the protection and survey of wide areas all over the prairies.

Receives Fellowship

Winnipeg, Man.—Dr. Murray Cleg-horn, Balduin, Man., has been selected for a fellowship in Public Health in the Connaught Laboratories of the University of Toronto. Word to that effect was received by Dr. T. A. Finck, deputy minister of Public Health, from Dr. Fitzgerald, director of the Connaught Laboratories and the school of Hygiene of the University at Toronto.

Plan Your Town--- Save Your Money

Avail Shums--Little Boy, "Tad No
Wally" His House

The other day the writer heard a conversation between two men on the street. One said: "What's all this I hear nowadays about 'town-planning'?" What is town-planning? Another said: "What's town-planning? It's no other than to waste people's money."

"No," said the other man, "It's just another plan to save people's lives and health and money besides."

He was right. Town-planning, done properly and early enough in the life of a growing town or city, does all those things. Perhaps the earliest illustration we have in history of town-planning is, however, a little unfortunate. When the great city of Rome was expanding in the centuries following the formation of the Roman Empire, the highly civilized Romans were so anxious to replace the old buildings and crooked, narrow streets that they put on a sort of private agitation with the result that, in the time of Nero, the older parts of the city were fired, and Rome burned.

Whether or not that be true, no one today advocates such drastic methods for paying the way for town-planning. It is today based upon co-operation between land-owners and municipal authorities, for the general good of the public, so that the city or town may be built to facilitate proper sanitation, convenience and healthy and pleasant living arrangements.

Consider the important question of sanitation. If a city grows haphazard, as most cities have done in the past without its leaders giving a jealous eye to the future, that city's cleaning bills may be unnecessarily high. Expensive properties may have to be expropriated in order to lay sewers and water mains, or to put in pumping stations or filters. Town planning looks ahead and prevents such unnecessary expense.

These of us who live in Toronto see every day a traffic situation which might have been averted by town-planning. Yonge Street, Toronto's main street, is so narrow to accommodate its traffic. Toronto is even now considering plans to re-model its downtown area. In other words, to do town-planning which will cost billions of dollars that might have been saved had the civic fathers of years ago been able to foresee something of the city's growth and the complexity of twentieth-century civilization.

But from the standpoint of health, one of the most important considerations of the town-planner, is playground space--parks as a rule. In Canada the growth of a city is usually, in fact one might say always, an industrial growth. The growth of the Ontario city of Ottawa is an example. A number of industries, for reasons of convenience or costs suddenly decide to take up their position at one point. The area thus favored is apt to grow with great rapidity, and unless the public men are statesmen who think in decades or even in generations instead of just terms of office, the growth of the new industrial centre from a village to a town or a city is apt to be haphazard.

Thus a city chokes by its own growth, and by the very life that makes it great, its desirability as a place in which to live, and its value as a commercial centre is lessened.

Proper planning of parks is a tremendous factor in the solution of this problem. For when a growing city takes trouble to lay out a system of parks, it will, chances are, give heed to the streets in proximity to those parks. And insofar as the health of the city is concerned, parks are vitally important.

It must be borne in mind at all times, that many people who will benefit most from the addition of parks to a city, will not take advantage of them unless they are made as easy as possible to reach. That is why you notice in most well-planned cities, that the parks are arranged so as to be on two sides of a road so that just as many people as possible can take advantage of their beauties.

"Go and buy a big trying pan and a gallon of oil."
"What for?"
"I am going fishing."--Pages Gates, Yverdon.

W. N. U. 1538

If streets are planned so that the outside edges of the city are not too hard to reach, the result in a great many cities has been artistic suburban sections where rents are cheap and working people can live in happiness and health. In this case, traffic conditions permit them to cover many distances in a shorter space of time in getting back and forth to their work, than would be possible if the conditions had not been studied in advance instead of letting them take their own natural course.

The habits of the citizens, the nature of the soil, the levels of the land and a hundred matters come into the scheme of things in town-planning, but they are mostly problems for the engineers and the technical men. Nevertheless, they are of extreme importance and difficult to handle if there is not complete harmony in making the arrangements between the owners of the land and the people who are doing the planning.

Some cities have found themselves in a position where they could insist that every house must have a plot of land of decent size around it. Here is an enviable state of things and one that every municipality should seek.

When one starts to grow a garden, we carefully lay it out so that all the plants will have breathing space no matter how thick the growth may become. If the plants become too thick in one place, we do what we call thinning out.

It is rather difficult to "thin out" a city, so we must do all our thinking in town-planning in advance.

It is however, only in recent years that town-planning has become a very active feature of our municipal life. Many cities and towns are appointing commissions to guide the destinies of their municipalities. They work on the principle that the tree will grow pretty much as the twig is bent. The future development of these far-seeing cities and towns will not be by accident; it will be the result of thoughtful arrangement with the health and comfort of the majority constantly in view.

People Expect Courtesy

Firms Whose Employees Are Polite
Do Better Business

The public en masse may not be conspicuously polite, but it desires respectful consideration from the employees of the concerns with which it may be doing business. It expects courteous and correct answers to its questions no matter how foolish and unnecessary they may seem to others; and if they seem to be unfamiliar with what to the initiated may seem simple procedure, they do not wish to be treated as a bunch of "Rubes." The public takes its self-respect rather seriously and answers to its questions no matter how foolish and unnecessary they may seem to others; and if they seem to be unfamiliar with what to the initiated may seem simple procedure, they do not wish to be treated as a bunch of "Rubes." The public takes its self-respect rather seriously and answers to its questions no matter how foolish and unnecessary they may seem to others; and if they seem to be unfamiliar with what to the initiated may seem simple procedure, they do not wish to be treated as a bunch of "Rubes."

This requires training and discipline. A youth cannot become courteous overnight. Courtesy cannot be put on like a garment. It must be inbred if it is to stand the hard usages of life. More attention, we think, might be paid by the home and the school in instilling and developing the spirit of courtesy within the young. No young man, no matter how well educated he may be, is fit to assume public duties unless he is always able to manifest courtesy toward others. The age of chivalry may be dead, as Burke said many years ago. But the age of courtesy will never die. Wise are the youths who realize the great potentialities of courtesy, and how essential it is to success. It should not be forgotten that while it will bring financial reward it insures something more to be desired than even this; the esteem of one's fellow men.

Grows Millions Of Radishes

Texas Man Raises More Than Anyone
In World

Upon the 1,400-acre farm of E. C. Caldwell, near Odem, Texas, laborers are employed gathering radishes and beets for shipment to the markets of the north and east. Caldwell has 700 acres planted in radishes, and has already shipped 400 carloads, and still has approximately 200 carloads to gather before the season is closed. Each car contains approximately 75,000 bunches of radishes and the total number of bunches shipped by the end of the season will be around 40,000,000. Mr. Caldwell is said to be the largest radish grower in the world.

The Young Man: "I've come to see, you about your daughter."
Girl's Father: "Too late--she eloped last night with a young fool who has no money."
The Young Man: "You're right about the money--but I'm not a fool."

Similarity Between Indians and Chinese

Both Have Great Reverence For
Their Women Ancestors

The modern Indian no longer adheres to primitive ways in many of the matters touching his daily life. But he has evidently still an innate regard for the tribal customs of the long ago when it comes to methods of government.

By a ballot vote of the residents on the Onondaga Reserve, in Ontario, it has been decided that the women shall continue to elect the Chiefs and Council. Thus the modernistic tendencies of the younger generation, a generation that rides in automobiles and has been educated in a modern academic and vocational school, have been squelched for the time being.

It is not surprising that modernism should seek to find expression in the exercise of the franchise. In this case the modernism took the form of demanding votes for men; not votes for women. Therein lies the difference between the Indian way of looking at things and the ways of the white man.

Presumably the method descends from the ancient belief in and reverence for ancestors and the pinnacle to which the Indian elevates motherhood. The same ideal is even more strongly marked in the Chinese, who are the most ardent ancestor worshippers in the world, particularly of women who are the heads of families. The most powerful figure in a Chinese family is a grandmother. Her word is law in all matters concerning anything that pertains to family affairs, even her eldest son being a mere nonentity by comparison. To argue with a grandmother, to make a suggestion that differs from hers in the smallest degree, to refuse to do as she says, is tantamount to a belittling offence which nothing but death can expiate. Her position as a grandmother, her years of experience, are revered as nothing else can be.

The modern Indian is a far more enlightened being, however, than the average Chinese. But there appears to be a similarity between the aboriginal Canadians and the Chinese in respect for the wisdom of the womenfolk.

The Sea's Greatest Depth

Spot Near Philippines Is Just Short
Of Seven Miles

Soundings of the Mindanao Deep in the Pacific Ocean, near the Philippines, proved recently that the sea's greatest depth is 35,410 feet, which is just short of seven miles. In such a hole the highest peak would be lost more than a mile below the waves. From the top of Mount Everest to the bottom of Mindanao Deep, is a vertical drop of little over twelve miles. Accurate and rapid measurement of these great depths was made possible by the "sonic depth finder," a device developed during the World War, that uses the echo from the ocean's floor in making its soundings. If the bed of the North Atlantic were drained away, a great pit, 27,972 feet deep, would be found near Porto Rico, marking the spot of the Atlantic's greatest depth. A plateau would be found near the Azores and a vast table land would appear near Newfoundland. A typical cross section of the ocean made by the U.S. warship "Stewart" in 1922, in spite of stormy depressions, proves that great stretches of the ocean's floor are comparatively level.

A course in blind flying for aviators, to accustom its traffic pilots to night and fog flying, has been established by a German air transportation company.

C.P.R. ASSISTANT PASSENGER TRAFFIC MANAGER

N. R. Desbriass, now assistant passenger traffic manager for the Canadian Pacific Railway, western lines, succeeding C. E. McPherson, retired. Mr. Desbriass was formerly general passenger agent at Vancouver.

The Maple Sugar Industry

People Of Canada Can Consume All
That Is Produced

That Toronto newspaper which says that the maple syrup and sugar industry of Canada faces ruin because under the new United States tariff the duty on these products is to be higher bids fair to drive the comic journals out of existence. Amount of maple sugar and syrup made in Canada in these latter days is small and is growing smaller, not because of hostile tariffs, but for the reason that maple groves are becoming fewer in number and reduced in size. Should not a drop of maple syrup or an ounce of maple sugar leave Canada, the people of the Dominion can easily consume all of it. These are wholesome articles of which the people of this country would do well to use more. People of the prairie provinces would be glad to have available to them all of these products they want.

Sunshine Is Essential

Poultry House Should Face South Or
South-East

Experience has taught that the poultry house should face the south or south-east. This is important as it admits the maximum of sunshine which is the cheapest disinfectant. If, however, it is not convenient to build a permanent house with its face to the south, the Dominion Poultry Husbandman, in the new bulletin No. 132, of the Department of Agriculture, at Ottawa, states that good results have been obtained by putting a row of windows along the back of the house under the drop-board. When this is done it is of great importance to have the windows light so that no draught will strike the hens.

Another suggestion contained in the bulletin is that where permanent poultry buildings are being constructed that they be planned so that they may be enlarged or added to as poultry operations grow.

Always Pays

A St. Louis man who was quartered in a small French village during the war, where he struck up an intimate friendship with one of its citizens, has received word that his friend thus acquired has bequeathed him an old brick house valued at \$27,000.

Kindness does not always pay in such large financial returns, but it always pays.

Ocean Safer Than Lakes

Captain Would Rather Navigate Ship
In Deep Waters

On the Great Lakes sailors class as men who follow a seasonal occupation. That may sound to salt-water people like an opening for jeers. Seamanhood looks a bit like farming when men remain snugly on shore during the four or five coldest and stormiest months of the year. Poets and story writers, at least, appear never to have found much appeal in the lives of the summer-time sailors of the inland seas. Literature which would produce thrills must have its heroes face fearful things in winter. To be shattered by the blast between May and November gives more the impression of an unlucky accident than an adventure.

Any who are inclined to that hasty view, however, should form a chummy acquaintance with some old lake man and hear his opinion of the comparative ease of salt-water navigation, where there are thousands of miles of seaway in which to keep a ship afloat. Why should a vessel ever be lost under such conditions? Here on these inland seas a ship never can get more than about fifty miles from land. The hurricane that on salt water makes the mariner furl and flee catches him on the lakes with no room to flee. An hour or two of heedless driving before the wind would bring him on the rocks almost anywhere. Handling a ship where the nearest land is five miles under the keel isn't much to worry about, the lake sailor declares. It is when the land lies all around him that the navigator must keep awake. That condition prevails all the time and everywhere on the Great Lakes. The lake captain must know not only his ship, but his shore. He must be not only a seaman, but a pilot, with the entire 1,000 miles and more between Buffalo and Duluth or Chicago as the field of his special localized knowledge.

One On the Policeman

New York Man Gets Best Of Argument
About Parking

The other day a young gentleman parked within ten feet of a fire hydrant in Worth Street--or so a policeman said. "I'm going to give you a ticket," said the policeman. "Wait a minute," protested the young fellow. "How do I know I am too close to that hydrant?" "I'll show ya," the policeman replied, and stepped off the distance, toe and heel. It came to nine and a half feet--policeman's feet. "What does that prove?" demanded the young man, who must have been of enormous courage. "Maybe your feet are more than a foot long. Certainly," he continued with a downward glance. "They look much longer to me." The policeman stared at him dazed and then, muttering feebly, walked away.

Had Enough Of Sea

Two sailors in a train were discussing the general situation. Said the tall one: "When I git done with this hitch, I'm going to git me a pair of nice light cars, and I'm going to sling them across my shoulder and start to walkin' inland. When I finally hit a place where people say, 'What are them things you got on your shoulder?'--boy, that's where I'm going to settle down!"

Good For Zero Weather

A "heatable" shoe has just been invented by a Hungarian shoemaker. An electric pad is concealed between the inner and outer soles, and the wearer may heat it by attaching a connector in the heel with a wall plug. The heat lasts about an hour and a half.

Obligations Of Industry

Employers Should Consider Welfare
Of Those Who Make Business
Possible

Industrialists who consider only profit and loss and heed not consider the welfare of the employees who contribute so much to the profits are, in the opinion of Mr. Denton Massey, morally no further advanced in their civilization than the cavemen in his. Mr. Massey was speaking at a meeting of the Industrial Accident Prevention Association.

Industry has made a great deal of progress in that direction during the present century, although the impetus has come more from without than within. Legislation has compelled the use of safety devices and the taking of many other precautions to prevent accidents, and if there seem to be more accidents than there used to be, that is no doubt due to the fact that there is so much more machinery in operation.

Employers cannot regard callously the maiming of men and women who may only be cogs in a great industrial machine. To lose a hand or arm, or even a finger, to lose an eye or to be crushed bodily, causing a person to be handicapped for life, is a deplorable misfortune. Anyone who has had an injured arm and been unable to use it for some days can fully realize that.

There is another form in which employers owe obligations to their workers. That is to ensure practical security of tenure to the efficient hands so far as their jobs are concerned. Men may be buying their homes, and if they lose their employment they may lose all they have. There is no more damaging blight on a man's efficiency than the spectre of unemployment. An employer should have a strong moral reason, as well as an economic one, before he decides to turn a man out of his job.

Pure Seed Important

Soil Conditions Should Also Be
Considered When Selecting
Variety

With the wide range of climatic and soil conditions which obtain throughout Canada, purity of variety in seed is of outstanding importance. A variety which gives good results in the southern and eastern sections of the Dominion often proves entirely unsuited to the more rigorous conditions of the heavier soils and harder climatic conditions of the north or west. There is also a marked difference in the size, color and quality of different varieties of the same seed, and with grain it is particularly important that the seed sown should be pure as to variety.

The Dominion Seed Branch are extending the work of purity of variety tests this year. Inspectors of the branch have already obtained samples of the seed of cereals, flax, peas, and beans, from seedsmen throughout Canada. The cereal division of the Dominion Department of Agriculture, at the central experimental farm, will test these samples for purity of variety and the results of these tests will prove particularly important to the trade and to Canadian farmers.

In Commercial Class

Saskatchewan lignite was placed definitely in the commercial coal class when the first tests to illustrate the utility of the coal were made in Regina, says the Canadian Press. The tests were conducted under the direction of Hon. J. A. Merkle, Provincial Minister of Railways, Labor and Industries. The development of a great coal industry in the southern part of the province is predicted, as well, from the engineers' findings.

Famous Cattle For Canada

A despatch from the Isle of Jersey states the cattle industry of the island has received a severe shock in the announcement that John Perre, Jersey's foremost breeder, has sold his herd consisting of about 100 head of prime cattle to Messrs. S. H. Bull and Son, of Brampton, Ontario. The Jersey breeders regard it as something of a calamity that the herd should be allowed to leave the island.

Lady (to man with hat on back to front): "Yes, are you coming or going?"--Gutierrez, Madrid.

"Polly" on the Air

John Gay's second comic opera, "Polly," which forms a sequel to "The Beggar's Opera," following the recently Captain MacHeath from a London goal to scenes of new adventure in the West Indies, and introducing celebrated Polly Peachum, was presented for the first time on the air on Sunday, May 11, from 9.15 to 9.45 p.m., eastern daylight saving time, in the Canadian Pacific Railway's programme of music from station WJZ and twelve affiliated stations of the National Broadcasting Company.

The following well-known Canadian artists took part in this presentation: Jeanne Dusseau, soprano, as "Polly"; Allen Burt, alto of the American Opera Company, as "Captain MacHeath"; masquerading as "Morano"; Beatrice Morson, contralto, as "Mrs. Trapes"; John Detweiler, baritone, as "Lieutenant Vanderbluff"; and Alfred Heather, tenor, as "Mr. Ducaul."

Reduction In Prices of RED ROSE TEA

Effective Immediately

10c. per pound reduction on Green Label
Black Tea.

5c. per pound reduction on All Other
Grades.

Higher Markets for finest quality TEAS, which
are scarce, preclude greater reduction.

All Grocers are authorized to sell their present
stock at these reductions. We refund to the
Grocer the drop in price. We bear the loss.

CHAPTER XIII.—Continued

"Oh, Grandma! You might have
made him angry."

"Not Gam Garfield. He likes to
make believe he's stern, but he's real
good-natured underneath. He laughed.
"I guess he forgot he was a lawyer
with an important case. And then he
right down where you are, child, and
said: 'It's you who ought to be
spanked, Grandma Davis. You charged
my client ten dollars for a string
o' beads that's worth about ten
cents.'"

"Ten dollars!" gasped Charmian.
"What an idea! But you did charge
too much, Grandma, and—"

"I never heard there was a law to
keep a body from getting as much as
he could in a trade," interrupted the
old lady. "I said as much to Gam,
and he had to admit that the law
was on my side—considering. And I
told him, too, that if Edgar Purdie
said he paid ten dollars for those
beads, why he was a liar on top of
all his other sins. I was real indig-
nant."

Troubled though she was, Char-
man couldn't suppress a laugh at the
picture Grandma's words brought up.

"I guess he saw I was kind of
riled," she said, "Don't you worry,

READ OF A CASE LIKE HER OWN

Decided to take Lydia E.
Pinkham's Vegetable
Compound

Moncton, New Brunswick—"Before
my last baby was born I was very weak,
nervous and discouraged. I saw
an advertisement in the paper about a
woman who had been like me so I
bought a bottle of
Lydia E. Pink-
ham's Vegetable
Compound. I took
three bottles and
it carried me safely
through that
critical time. I
have three children to care for and I
feel well and strong. I have told two
other women about your medicine."

Mrs. Gus Amsbury, 22 Albert Street,
Moncton, New Brunswick.

W. N. U. 1838

Grandma. I won't let you get into
any trouble if I have to commit
perjury myself to prevent it; but
what did the deacon pay for those
damn beads?"

"Did you tell him?" asked Char-
man breathlessly.
"I did; but not till I'd asked if
he was making a social call or one
in the interest of his client. He
grinned and said, 'You ought to
have been a lawyer yourself, Grand-
ma Davis, but I'm just dropping in
to pass the time o' day with an old
friend.' So I told him the whole
story, Charmian. Honestly, child, I
thought he'd have hysterics. There
wasn't a shred of dignified lawyer
left in him when I got through."

"But what's he going to do?"

"It don't make a mite o' differ-
ence to me what he does, so long as
we're not dragged in; and we won't
be, for I don't know Gam. He said,
confidentially, that he thought when
the deacon cooled off a little, and he
pointed out the big expense of a law
suit, that it would all be settled out
of court. Just now Edgar's mad
clean through. He says Lydia's the
only woman he ever proposed to that
refused him, and claims that she led
him on something scandalous."

"Well, dearie, maybe you'd better
get us some dinner. It's been an
exciting morning and I feel all gone.
On top of everything else there's been
a fearful cat fight in Lizzie Baker's
yard. I could hear the yowls as loud
as if they were in this room. They'd
be at it now if George K. Knowles
hadn't come along and turned Lizzie's
hose on 'em. And there are folks
who say that nothing happens in
Wickfield!"

Charman laughed as she went to-
ward the kitchen, glad there was
enough excitement on hand to keep
Grandma from asking too many
questions about her ride with Jim;
but as they were finishing their
meal the old lady queried suddenly:
"Did you enjoy your ride? And did
you get my catalogue from Emmy?"

"Oh, dear!" cried Charmian, "I
left it in the car."

"It's no great matter," responded
Grandma comfortably. "If Jimmy
died it he'll bring it 'round to-night.
Like as not he'll be glad of an excuse
to come. Did Emmy say what she
was ordering?"

"A hat," smiled Charmian. She
wasn't going to be outdone by Clara
Darling."

"Do tell!" ejaculated Grandma.
"Did she show you the picture,
dearie? There were some awful
pretty hats on page fifteen. What
color will it be? Green doesn't go
well with most of Emmy's things."

Charman laughed.
"It's possible, you know, to buy
some other color, even by mail. I
didn't see the picture, Grandma. It
was Jim who went in, and Emmy
asked his advice about it."

"Then he can show me which one

it is when he brings the catalogue.
Emmy's not liable to be extravagant,
but it does seem risky getting a hat
clear from Chicago. It might get
mashed in the mail, and then where'd
she be? Maybe that's Jimmy now.
There's an auto stopping. If 'tis,
you call him in, dearie, so he can
show me—"

"That you, Jim?" called Char-
man, half rising as the front door
opened. "Come in a moment.
Grandma wants you."

Jim, who had eaten hastily and
was on his way back to the bank,
obeyed willingly enough. He had
the bulky catalogue under his arm,
and though he smiled at Grandma,
his eyes shifted to Charmian, as if
to discover if she looked more cheer-
ful than when he left her.

"You sit down," commanded
Grandma. "I guess George K. can
run the bank without you for ten
minutes. Draw up a chair. I want
you should show me the hat that
Emmy Bascomb's been fool enough
to order without first seeing the
quality."

"Good thunder!" objected Jim.
"This book is three hundred and fifty
pages thick! How'm I to find—"
"The hats begin on page fifteen,"
broke in Grandma. "They look real
pretty in the pictures; but I've never
seen but one mail order hat, and ex-
cept for making a good deal of com-
motion around town—"

"Grandma," Charmian interrupted

What About Your Dairy Pails?

SMP Dairy Pails are made
of special quality tin with
bright polish. There's
weight to SMP Dairy Pails
... Strength to do years
of good, honest work. 100%
sanitary. Easy to keep
clean. Look for the SMP
label of Quality. 20c. to
\$2.85.

**SMP
DAIRY PAILS**

sternly, "I've got a notion that Jim
is sick and tired of hearing about
that hat. Let him alone. He's got
a right to admire a green hat if he
wants to. The truth is, I liked it
myself!"

"You did!" gasped Grandma, as-
tonished; while Jimmy laughed, the
first real laugh of the day—for him.
For a moment his eyes met Char-
man's with their old twinkle, then
returned to the book, and he said
dubiously:

"It must be this one. I remember
it kind of hung down one side, and
had a red rose on the other."

"Read what it says, sonny. I
haven't got my glasses."

Jim obeyed, reading with mock
solemnity: "A dressey model with
soft, girlish lines that you will sim-
ply adore. The brim is of two colors
of dainty lace-patterned straw. Col-
ors: black with a red rose; meadow
pink with sand; gobella blue with
crab apple. Price only one-fifty-nine.
Shipping weight two pounds! That
sounds pretty swell, Grandma,
doesn't it? Emmy was hovering be-
tween the black with the red rose,
and the blue with the crab apples or
carrots. I gave her a shove toward
the blue, and ran, or she'd still be
asking my assistance. Now I must
skip, or George K. will think I've
absconded with his interest money."

Again his eyes sought Charmian's,
but at the mention of interest, her
face hardened, and she turned away.
A moment later the whirl of an en-
gine told her that Jim had gone, and
Grandma said, lifting her eyes from
the gaily colored paper: "Seems as
if that hat would be a little wide in
the brim for Emmy; but you never
can tell about a hat until you try it
on. I think she's running a terrible
risk, though they do say, 'money re-
funded if not satisfactory.' Still,
they might make a fuss if she sent it
back. Business men are hard-hearted
to deal with—that is, some of 'em
are, though Father always said there
were exceptions."

"I'd like to find one, then," said
Charman; but Grandma, still ab-
sorbed in Emmy's purchase, didn't
notice the sudden bitterness in the girl's
voice.

CHAPTER XIV.

It was with a very genuine glow
of happiness that Charmian learned
that the school board had given her
"District Four." Some years had
passed since she graduated from the
State Normal School—years when it
seemed best for her to stay with
Grandma; but as it became increas-
ingly difficult to meet expenses and
keep the old house in repair, the girl
realized that something must be
done, and to get the school only a
mile from her own door was a vast
relief.

(To Be Continued.)

CRYING BABIES ARE SICKLY BABIES

The well child does not cry — it is
only the sickly baby who cries. The
well child is laughing and happy.
Baby's cry of distress is his way of
telling his mother he is sick. He is
ill. Therefore, if your baby cries
do not delay in looking for the trou-
ble.

Baby's Own Tablets are a safe and
efficient remedy for childhood ail-
ments. They are a mild but thorough
cleanser which through their action
on the stomach and bowels banish
constipation and indigestion; break
up colds and sinuses; soothe and pro-
mote healthful sleep. They make
baby happy and keep him healthy.
They are sold by medicine
dealers or by mail at 25 cents a box
from The Dr. Williams' Medicine Co.,
Brockville, Ont.

Prince Knows Empire Well

Completed Ninth Tour When He
Returned From South Africa

On descending from the sky into
Windsor Great Park, the Prince of
Wales had completed the ninth of
his foreign and Empire tours. In
1919, just after the war, he came to
Canada and the United States. In
1920, he went to Australia; in 1921-
22 to India and Japan; in 1923 to
Canada again; in 1924 to the United
States; in 1925 to Africa and South
America; in 1927 to Canada; and in
1928-29 to Africa, the last trip being
cut short by the King's illness and
completed this year. In this last trip
he has traversed Africa from Cape
Towns to Cairo. He is the most travel-
led of princes, the most travelled of
world citizens. He has seen more of
the earth-grinding Empire, over
which he will one day rule, than any
of his future subjects. Which is as it
should be, for under the British con-
stitution the King and Emperor who
is well informed regarding his wide-
spread dominions is often able to offer
wise advice to his ministers.

American household electrical re-
frigerators are becoming popular in
Paris.

Minard's Checks Falling Hate

Clover Leaf Rolls made with ROYAL YEAST CAKES are a Delightful Change

Try this recipe:

1 Royal Yeast Cake dis-
solved in one-half cup
lukewarm water. 1 cup butter
1 cup salt 1 tablespoon sugar
1 cup flour 1 cup milk
1 cup butter

Pour the scalded milk over the sugar, salt and butter. When cooled to lukewarm add the dissolved yeast and one and one-half cups flour. Allow to stand well covered in moderately warm place over night, or, if sponge is set in morning, let stand until light. Add flour enough to knead. Let rise again until double in bulk, then cut down and knead slightly. Butter mullin rings and place three small balls of dough in each ring. Let rise until double in bulk, brush over with melted butter and bake in hot oven.

Bread is one of the most nourishing
of foods. It can be made more
interesting, however, by occasionally
varying the form of serving it.

If you bake at home, the Royal Yeast Cake Book will provide
you with many practical tested recipes for all kinds of home-
made breads. It will be mailed—free—on request.

Little Helps For This Week

"Behold I stand at the door and
knock."—Revelations III, 20.

Open the door with shame if you
have sinned.

If you be sorry, open it with sighs;
Albeit the place be bare for poverty,
And comfortless for lack of plen-
ishing.

Be not ashamed for that, but open it.
And take Him in that comes to sup
with thee.

No power—not even that of God
Himself—can open that door from
the outside. Only the soul itself can
open itself. But if, with perfect sim-
plicity and unaffectedness, any one
of us is able to just put aside the blot
of his own willfulness and open his
door and say, "Almighty God, come
to me; Spirit of Christ, be Thou
my Guest; Father, I have sinned, for-
give me," then it is as if the sharper
days of winter were melting into the
approaching spring, and as if one of
us came down some morning in his
heated house, and should throw his
door open to the gentle air, and there
should flow in upon him the milder
freshness and the pure fragrance of a
renewing and reviving word. —
Francis G. Peabody.

United States laws may have teeth
in them, but as a contemporary sees
it the impression grows that they
are false teeth—plates that can be
taken out whenever wealthy folk are
due to be bitten.

Ever since the first United States
census was taken, there have been
more men than women in the United
States.

A Brave Little Traveller
Little Joan Baxter recently ap-
peared on the White Star liner "Alber-
tic," bound for Halifax, with the fol-
lowing label attached to her coat:
"My age is 3 years. My mother is
dead, and I am going out to my dad-
dy in Saskatoon. I am travelling
alone, so please be good to me."

"So Skinny Shamed In Bathing Suit. Gained 15 Lbs."

"Gained 15 lbs. tak-
ing Ironized Yeast."
Bony limbs round out. Ugly
hollows fill in. Blemished skin gets
clear and rosy like magic. Nervous-
ness, indigestion, constipation dis-
appear overnight. Sound sleep. New
health and pep from very first day.

Two great tonics in one — special
weight-building Malt Yeast and
strengthening Iron Pleasant little
tablets. Far stronger than immedi-
ately yeast. Results in 15 lbs.
So quit being ashamed of "skin-
ny," "sallow" skin. Get Ironized
Yeast from druggist today. Feed
great tomorrow. Money back from
manufacturer if not delighted with
quick results.

The younger generation quickly
loses all interest, and gets rid of the
capital as well.

An American-financed line in
Brazil is adding more planes to its
fleet.

The upsets of Children

All children are subject to little
upsets. They come at unexpected
times, and are twice as serious
in the dead of night. But there's
one form of comfort on which a
mother can always rely; good old
Castoria. This pure vegetable
preparation can't harm the tiniest
infant. Yet mild as it is, it soothes
a restless, fretful baby like nothing
else. Its quick relief soon sees the
youngster comfortable once more,
back to sleep. Even an attack of

colic, or diarrhea, yields to the
soothing influence of Castoria.
Keep Castoria in mind, and keep
a bottle in the house—always.
Give a few drops to any child
whose tongue is coated, or whose
breath is bad. Continue with
Castoria until the child is grown.
Every druggist has Castoria; the
genuine has Chas. H. Fletcher's
signature on the wrapper.

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40¢ per inch for first week and 30¢ for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10¢ per count line. Legal advertising, 15¢ per count line for first week and 10¢ for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

Heard Around Town

The Ladies' Card Club met last Tuesday evening at the home of Mrs. Harry Smith, Mrs. Nelson Murray being hostess. The prize, a pair of lovely bath towels, was won by Mrs. Lee. This was the last meeting of the schedule. Next week the club meets with Mrs. Lee.

The regular meeting of the Ladies' Aid was held Thursday afternoon at the home of Mrs. C. W. Rideout. It was decided to pay \$25.00 on the church loan and purchase collection plates, also to serve lunch on Fair day. Next monthly meeting will be held at the church.

A meeting of the U.F.A. members was held in the school hall Saturday evening for the purpose of appointing delegates to attend the nominating convention held at Cereel Wednesday. The following were appointed from this local: Mrs. W. W. Isbister, Jas. Young and R. Stewart. As there were not many members present at the meeting, W. A. Todd and W. Milligan went out into the country on Monday afternoon to interview some of the members of the local.

Messrs Lorne Proudfoot, J. G. Connell and L. S. Dawson who went to Edmonton last Saturday with the delegation along the Goose Lake line, to interview the Hon. Mr. MacPherson, Minister of Public Works, regarding the gravelling of the government road along this line, returned home Tuesday. The delegation was accorded a good hearing at the capital, and while nothing definite was promised as to the gravelling of the road at the present time, assurance was given that this work would be done by the department within the next two years.

Nomination Meeting

A meeting will be held on Tuesday, May 27th, at 2 o'clock in the afternoon, at Cereel Hall, Cereel, Alberta, to consider nominating an Independent candidate to represent the electors of the Acadia Provincial Constituency in the forthcoming Provincial election. Every voter is cordially invited to attend.

Church Announcements

Bible study will be held at the A. E. Roberts home on Friday evening May 23, at 8 o'clock.

CHINOOK UNITED
